

MELBOURNE HIGH SCHOOL & MHSOBA CAREERS NIGHT 2024

Welcome to the MHS & MHSOBA Careers Night 2024

Career Theme for 2024:

Building your arsenal for many job opportunities in the future

By gaining insight into your interests, values, personality traits, skills, talents, and education requirements, you have taken a significant step towards finding a career path that aligns with your true self. Your arsenal of career add-ons must include formal qualifications and technical skills as well as the critical skills such as communication, collaboration, problem solving, emotional judgement, professional ethics and global citizenship identified as the skills or capabilities that will equip young people to thrive in this new work order. These skills are now being prioritised by policy makers globally to reform curriculum and are increasingly sought after by employers.

Armed with this newfound list of career add-on items, you are now equipped to navigate the vast sea of possibilities and opportunities that lie ahead. It is not only about achieving a very high ATAR, because learners at Melbourne High need to consider many more other elements in their education for them to effectively integrate into the future workforce. Australia's skills and education systems will need to be increasingly responsive to ensure that our labour force is suitably skilled to take up opportunities.
